

Bantoo Sehgal, MD

WHAT IS YOUR HEALTHCARE PASSION AND HOW DID YOU COME TO REALIZE IT?

I was in and out of the hospital as a child, and I was in awe at the amount of care and compassion given to me by my health care team. I knew then I wanted to be part of improving people's lives.

WHY DID YOU CHOOSE YOUR PARTICULAR SPECIALTY?

I see medicine, particularly orthopedics, as one of the few professions that allows patients to regain their quality of life. I chose my sub-specialty in sports medicine because it allows me to integrate my love for technology and use it to perform cutting-edge minimally invasive procedures.

TELL US ABOUT THE LATEST PROCEDURES OR NEW TECHNOLOGIES YOU ARE MOST PROUD TO OFFER.

I am fortunate to have had some great hip mentors who have given me the training to perform Anterior Hip Replacements. Seeing the success of this surgery first hand has made me a true believer in the procedure. Patients are extremely happy with not only the immediate pain relief but also that they can return to their activities within weeks of surgery.

“Each patient carries his or her own unique story. Listening to their specific goals helps me determine the best treatment option for them.”
